Training Parameters

Sector	Automotive
Sub-Sector	Manufacturing
Occupation	Machining Operation
Country	India
NSQF Level	3
Aligned to NCO/ISCO/ISIC Code	NCO-2015/ 7223.0601, 7223.1701, 7224.0402, 7223.1201
Minimum Educational Qualification and Experience	8th Class pass and pursuing continuous schooling in regular school with vocational subject OR 8th Class pass with 2 years relevant experience OR 8th Class pass + 2 year NTC/NAC OR 10th Class pass OR Certificate-NSQF (Automotive Machining Operator Level 2.5) with 1 Year of experience
Pre-Requisite License or Training	NA
Minimum Job Entry Age	18 years
Last Reviewed On	29/01/2021
Next Review Date	29/01/2026
NSQC Approval Date	29/01/2021
Model Curriculum Creation Date	29/01/2021
Model Curriculum Valid Up to Date	29/01/2026
Minimum Duration of the Course	600 Hours 00 Minutes
Maximum Duration of the Course	600 Hours 00 Minutes

Program Overview

This section summarizes the end objectives of the program along with its duration.

Training Outcomes

At the end of the program, the learner should have acquired the listed knowledge and skills.

- Interpret engineering drawings for identification of raw material, tools and equipment required for the machining operations.
- Carry out pre-machining activities such as lifting of workpiece, inspection of tools and equipment etc.
- Carry out various machining operations such as turning, drilling, reaming and tapping on conventional lathe and quality checks of the finished products for any damages and deformities.
- Work effectively and efficiently as per schedules and timelines.
- Implement safety practices.
- Optimize the use of resources to ensure less wastage and maximum conservation.
- Carry out grinding operations on conventional lathe and quality checks of the finished products for any damages and deformities.
- Carry out milling operations on conventional lathe and quality checks of the finished products for any damages and deformities.

Compulsory Modules

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

NOS and Module Details	Theory Duration	Practical Duration	On-the-Job Training Duration (Mandatory)	On-the-Job Training Duration (Recommended)	Total Duration
Bridge Module	05:00	0:00			05:00
Module 1: Introduction to the role of an Automotive Conventional Machining Technician	05:00	0:00			05:00
ASC/N9803 - Organize work and resources (Manufacturing) NOS Version No 1.0 NSQF Level - 3	15:00	40:00			55:00
Module 2: Organize work and resources according to safety and conservation standards	15:00	40:00			55:00
ASC/N9805 – Interpret engineering drawing NOS Version No. – 1.0 NSQF Level - 3	30:00	30:00			60:00
Module 3: Interpret engineering drawing	30:00	30:00			60:00

ASC/N3536 – Perform turning operations on conventional lathe NOS Version No. – 1.0 NSQF Level - 3	30:00	60:00	90:00	
Module 4: Perform turning operations	30:00	60:00	90:00	
ASC/N3537 – Perform drilling, reaming, tapping and boring operations on conventional lathe NOS Version No. – 1.0 NSQF Level - 3	50:00	100:00	150:00)
Module 5: Perform drilling, reaming and tapping operations	30:00	50:00	80:00	
Module 6: Perform boring operations	20:00	50:00	70:00	
ASC/N3539 – Perform grinding operations on conventional lathe NOS Version No. – 1.0 NSQF Level - 3	30:00	60:00	90:00	
Module 7: Perform grinding operations	30:00	60:00	90:00	
ASC/N3538 – Perform milling operations on conventional lathe NOS Version No. – 1.0 NSQF Level - 3	30:00	60:00	90:00	
Module 8: Perform milling operations	30:00	60:00	90:00	
DGT/VSQ/N0102 - Employability Skills (60 hours) NOS Version No. – 1.0 NSQF Level – 3	24:00	36:00	60:00	
Module 9: Introduction to Employability Skills	0.5:00	1:00	1.5:00	
Module 10: Constitutional values - Citizenship	0.5:00	1:00	1.5:00	
Module 11: Becoming a Professional in the 21st Century	1:00	1.5:00	2.5:00	
Module 12: Basic English Skills	4:00	6:00	10:00	
Module 13: Career Development & Goal Setting	1:00	1:00	2:00	
Module 14: Communication Skills	2:00	3:00	5:00	
Module 15: Diversity & Inclusion	1:00	1.5:00	2.5:00	
Module 16: Financial and Legal Literacy	2:00	3:00	5:00	
Module 17: Essential Digital	4:00	6:00	10:00	

Skills				
Module 18: Entrepreneurship	3:00	4:00		7:00
Module 19: Customer Service	2:00	3:00		5:00
Module 20: Getting ready for apprenticeship & Jobs	3:00	5:00		8:00
Total Duration	214:00	386:00		600:00

Module Details

Module 1: Introduction to the role of an Automotive Conventional Machining Technician

Bridge module

Terminal Outcomes:

• Discuss the role and responsibilities of an Automotive Conventional Machining Technician.

Durat	ion: <05:00>	Duration : <00:00>
Theor	y – Key Learning Outcomes	Practical – Key Learning Outcomes
•	List the role and responsibilities of an Automotive Conventional Machining Technician. Discuss the job opportunities of an Automotive Conventional Machining Technician. Explain about Indian automotive manufacturing market. List various automobile Original Equipment Manufacturers (OEMs) and different products/ models manufactured by them. Discuss the standards and procedures involved in the different processes of machining.	
Classr	oom Aids:	
White	eboard, marker pen, projector Equipment and Other Requirements	

Module 2: Organize work and resources according to safety and conservation standards

Mapped to ASC/N9803 v1.0

- Employ appropriate ways to maintain safe and secure working environment.
- Perform work as per the quality standards.
- Apply conservation practices at the workplace.

Duration : <15:00>	Duration : <40:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 List the potential workplace related risks and hazards, their causes and preventions. Identify PPE to be used at workplace. Identify various warning signs used at the workplace. Describe appropriate strategies to deal with emergencies and accidents at the workplace. Outline the organizational structure to be followed to report about health, safety and security breaches to the concerned authorities. Discuss the importance of keeping work area clean and tidy. Discuss the significance of conforming to basic hygiene practices such as washing hands, using alcohol based hand sanitizers or soap. Discuss organizational hygiene and sanitation guidelines and ways of reporting breaches/gaps if any to the concerned authorities. Discuss the ways of dealing with stress and anxiety. Discuss how to complete the given work within the stipulated time period. Explain how to maintain a proper balance between team and individual goals. Explain 5S guidelines at workplace. List the various materials used at the workplace. Explain organisational recommended procedure for storage of tools, equipment and material after completion of work. Explain the ways to optimize usage of resources. Discuss various methods of waste management and its disposal. List the different categories of waste for the purpose of segregation Differentiate between recyclable and non-recyclable waste State the importance of using appropriate colour dustbins for different types of waste. Discuss common practices for conserving electricity at workplace. 	 Apply appropriate safety practices to ensure safety of people at the workplace Display the correct way of wearing and removing PPE such as face masks, hand gloves, face shields, PPE suits, etc. Demonstrate the use of fire extinguisher. Apply basic first aid procedure in case of emergencies. Perform routine cleaning of tools, equipment and machines. Employ various techniques for checking malfunctions in the equipment as per Standard Operating Procedure (SOP). Show how to sanitize and disinfect one's work area regularly. Demonstrate the correct way of washing hands using soap and water. Demonstrate the correct way of sanitizing hands using alcohol-based hand rubs. Demonstrate how to evacuate the workplace in case of an emergency. Demonstrate sorting of materials, tools and equipment and spare parts after completion of work. Demonstrate the steps involved in storage of tools, equipment and material after completion of work. Perform basic checks to identify any spills and leaks and that need to be plugged /stopped. Demonstrate different disposal techniques depending upon types of waste. Employ different ways to check if equipment/machines are functioning as per requirements and report malfunctioning, if observed. Employ ways for efficient utilization of material and water.

Discuss the common sources of pollution and ways to minimize it.

Classroom Aids:

Whiteboard, marker pen, projector

Tools, Equipment and Other Requirements

- Housekeeping material: Cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel, fire extinguisher
- Safety gears: Safety shoes, ear plug, goggles, gloves, helmet, first-aid kit

Module 3: Interpret engineering drawing *Mapped to ASC/N9805 v1.0*

- Describe the basics of engineering drawing.
- Interpret the machine drawings and symbols for understanding the job requirements.

Duration: <30:00>	D	Ouration: <30:00>	
Theory – Key Learning Outcomes		Practical – Key Learning Outcomes	
 Identify uniqueness, d important features of 2D an Identify types of lines, angle symmetry in shapes. Differentiate between first angle projection. Interpret 3 axis (x, y and z axi machine symbols used in dr Describe GD&T and use of drawings. Identify required limits and component from drawing. Explain standards used in leassembly drawings. Identify organisational drawinterpreting the work appropriately. 	es, points and their angle and third s) of projection and awing. its symbols in the tolerances of ndia for making wing standards for	projection. Demonstrate appropriate way of reading and interpreting the shapes (cones, cylinder, sphere, cuboid, etc) on to a 2D and 3D projection. Interpret and read orthographic and isometric views. Read GD&T symbols in the given drawing. Employ appropriate ways of storing the drawings in a defined and appropriate place.	
Classroom Aids:			
Whiteboard, marker pen, projecto	or		
Tools, Equipment and Other Requ	uirements		
Drawing toolsMachine drawing handbeMachine drawings			

Module 4: Perform turning operations *Mapped to ASC/N3536 v1.0*

- Identify tools and equipment required for turning job.
- Demonstrate turning operations on conventional lathe machine.
- Show how to carry out post-machining activities such as quality check, cleaning, maintenance etc.

Duration: <30:00>		Duration: <60:00>
Theo	ry – Key Learning Outcomes	Practical – Key Learning Outcomes
	Discuss the information derived from the engineering drawings to identify the work requirements. State the Standard Operating Procedures (SOP) for operating conventional lathe machine. Discuss operational fundamentals of turning machines. Outline the process flow of turning operations. List input material, jigs and fixtures, tools, cutting tools, workholding devices, equipment and measuring instruments required during the machining and post-machining work. Summarise the steps to be performed for checking the raw material, tools and equipment before use. List tooling instructions for fixtures, cutting tools, jigs, gauges etc. mentioned in operating manual/Work instructions. Discuss how to load, unload, fix and set the machine parts, tools and cutting tools safely on machine. Recall the steps for mounting, installing, positioning and aligning tools, attachments and fixtures on machine as	 Demonstrate the standard operating procedures to use the tools, cutting tools, workholding devices, equipment and measuring instruments required during job. Apply appropriate ways of checking the raw material, tools and equipment for defects before use. Demonstrate how to set the conventional lathe machine for turning operations and adjust the machine controls within specified tolerances as per the work instructions. Show how to mount, install, position and align tools, cutting tools, attachments and fixtures on machine by using appropriate tools and measuring instruments. Employ appropriate ways of lifting and positioning the workpiece on machine safely by using appropriate tools and equipment. Apply appropriate ways to verify the alignment and position of workpiece on machine. Perform the steps to select and install the pre-set tooling in the machine tool post.
•	per work instructions. Discuss the process of lifting, positioning and verifying the position of the workpiece on the machine by using appropriate tools and equipment.	 Demonstrate how to set and select the machine parameters as per the work instructions. Display how to move cutter or turning hand wheel manually for turning job.
•	Elucidate the steps to be performed for selecting and installing the pre-set tooling in tool post. Discuss machine parameters like cutting speed, depth of cut, feed rate etc. and their impact on output.	 Demonstrate organizational specified procedure of starting the machine and performing turning operations. Employ appropriate ways of inspecting the manufactured component specifications and dimensions with the

- Explain process of evaluating the specifications, dimensions and irregularities of machined component with the specified specifications.
- Recall the tasks to be performed postmachining.
- Discuss the process of segregating the ok and damaged workpieces and maintaining records of each category.
- List the steps to be performed for observing the machine operations for any defects in its component and informing the supervisor/maintenance team.
- Discuss organisational standards and procedures for routine machine maintenance and replacing worn out tools.
- Discuss the necessary precautions to be taken to avoid any hazard and accident during machining activities.

- specified specifications and dimensions in the job orders.
- Apply appropriate inspection methods for identifying the defects, checking the quality of machined workpieces and noting the observations of inspection process as per the control plan.
- Show how to segregate damaged and ok workpieces and maintain records as per work instructions.
- Prepare a report about malfunctions and defects observed in machine during the machining process.
- Employ appropriate ways for doing routine machine maintenance and replacing worn out tools timely from the machine.

Classroom Aids:

Whiteboard, marker pen, projector

Tools, Equipment and Other Requirements

- Basic tool box, Work bench with vice
- Machining tools/ equipment: Surface marking plate, cutting tools, threading, dies & guides, etc.
- Machines: Conventional lathe machine with standard accessories
- Measuring equipment: Vernier calipers, micrometre, feeler gauges, bore gauge, slip gauge, thickness gauge, steel ruler, measuring tape, height, gauge, dial gauge, angle plate, set square compass etc.
- Hand book, job orders, machine drawings, work order.
- **Safety materials**: Fire extinguisher, leather safety gloves, leather aprons, safety glasses with side shields, ear plug, helmet, safety shoe and first-aid kit.
- Cleaning material: Tip cleaner, wire brush (M.S.), cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel

Module 5: Perform drilling, reaming and tapping operations Mapped to ASC/N3537 v1.0

- Identify tools and equipment required for drilling, reaming and tapping job.
- Demonstrate drilling, reaming and tapping operations on conventional machine.
- Show how to carry out post-machining activities such as quality check, cleaning, maintenance etc.

Durat	ion: <30:00>	Duration: <60:00>
Theory – Key Learning Outcomes		Practical – Key Learning Outcomes
	Discuss the information derived from the engineering drawings to identify the work requirements. Discuss Standard Operating Procedures (SOP) for operating drilling, reaming and tapping machines. Outline the process flow of drilling, reaming and tapping operations. List input material, jigs and fixtures, tools, cutting tools, workholding devices, equipment and measuring instruments required during the machining and post-machining work. Summarise the steps to be performed for checking the raw material, tools and equipment before use. Recall tooling instructions for fixtures, cutting tools, jigs, gauges etc. Discuss how to load, unload, fix and set the machine parts, tools and cutting tools safely on machine. List the steps for mounting, installing, positioning and aligning tools, attachments and fixtures on machine as per work instructions. Discuss the process of lifting, positioning and verify the position of the workpiece on the machine by using appropriate tools and equipment. Discuss machine parameters like cutting speed, depth of cut, feed rate etc. and	 Demonstrate the standard operating procedures to use the tools, cutting tools, workholding devices, equipment and measuring instruments required during job. Apply appropriate ways of checking the raw material, tools and equipment for defects before use. Demonstrate how to set the conventional lathe machine for drilling, reaming and tapping operations and adjust the machine controls within specified tolerances as per the work instructions. Show how to mount, install, position and align tools, cutting tools, attachments and fixtures on machine by using appropriate tools and measuring instruments. Employ appropriate ways for lifting and positioning the workpiece on machine safely by using appropriate tools and equipment. Apply appropriate ways to verify the alignment and position of workpiece on machine. Demonstrate how to set and select the machine parameters as per the work instructions. Show how to operate drilling, reaming and tapping tool or turning hand wheel
•	their impact on output. Explain process of evaluating the specifications, dimensions and irregularities of machined component with the specified specifications. Recall the tasks to be performed post-	 manually for drilling, reaming and tapping job. Demonstrate organizational specified procedure of starting the machine and performing drilling, reaming and tapping operations.
-	machining.	 Employ appropriate ways of inspecting the manufactured component

- Discuss the process of segregating the ok and damaged workpieces and maintaining records of each category.
- List the steps to be performed for observing the machine operations for any defects in its component and informing the supervisor/maintenance team.
- Discuss organisational standards and procedures for routine machine maintenance and replacing worn out tools.
- Discuss the necessary precautions to be taken to avoid any hazard and accident during machining activities.

- specifications and dimensions with the specified specifications and dimensions in the job orders.
- Apply appropriate inspection methods for identifying the defects, checking the quality of machined workpieces and noting the observations of inspection process as per the control plan.
- Show how to segregate damaged and ok workpieces and maintain records as per work instructions.
- Prepare a report for the supervisor about malfunctions and defects observed in machine during the machining process.
- Employ appropriate ways for doing routine machine maintenance and replacing worn out tools timely from the machine.

Classroom Aids:

Whiteboard, marker pen, projector

Tools, Equipment and Other Requirements

- Basic tool box, Work bench with vice
- Machining tools/ equipment: Surface marking plate, cutting tools, threading, dies & guides, etc.
- Machines: Conventional lathe machine with standard accessories
- **Measuring equipment**: Vernier calipers, micrometre, feeler gauges, bore gauge, slip gauge, thickness gauge, steel ruler, measuring tape, height, gauge, dial gauge, angle plate, set square compass etc.
- Hand book, job orders, machine drawings, work order etc.
- **Safety materials**: Fire extinguisher, leather safety gloves, leather aprons, safety glasses with side shields, ear plug, helmet, safety shoe and first-aid kit.
- Cleaning material: Tip cleaner, wire brush (M.S.), cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel

Module 6: Perform boring operations *Mapped to ASC/N3537 v1.0*

- Identify tools and equipment required for boring job.
- Demonstrate boring operations on conventional machine.
- Show how to carry out post-machining activities such as quality check, cleaning, maintenance etc.

Duration : <20:00>	Duration: <50:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Discuss the information derived from the engineering drawings to identify the work requirements. Discuss Standard Operating Procedures (SOP) for operating boring machines. Outline the process flow of boring operations. List input material, jigs and fixtures, tools, cutting tools, workholding devices, equipment and measuring instruments required during the machining and post-machining work. Summarise the steps to be performed for checking the raw material, tools and equipment before use. Recall tooling instructions for fixtures, cutting tools, jigs, gauges etc. mentioned in operating manual/Work instructions. Discuss how to load, unload, fix and set the machine parts, tools and boring tool safely on machine. List the steps for setting boring tool into boring bar as per work instructions. Discuss the process of lifting, positioning and verify the position of workpiece on the machine by using appropriate tools and equipment. Discuss machine parameters like cutting speed, depth of cut, feed rate etc. and their impact on output. 	 Demonstrate the standard operating procedures to use the tools, cutting tools, workholding devices, equipment and measuring instruments required during job. Apply appropriate ways of checking the raw material, tools and equipment for defects before use. Demonstrate how to set the conventional boring machine as per the work instructions. Show how to set and position the boring tool, attachments and fixtures on machine by using appropriate tools and measuring instruments. Employ appropriate ways for lifting and positioning the workpiece on machine safely by using appropriate tools and equipment. Apply appropriate ways to verify the alignment and position of workpiece on machine. Demonstrate how to set and select the machine parameters as per the work instructions. - irregularities of machined component with the specified specifications.
- Recall the tasks to be performed postmachining.
- Discuss the process of segregating the ok and damaged workpieces and maintaining records of each category.
- List the steps to be performed for observing the machine operations for any defects in its component and informing the supervisor/maintenance team.
- Discuss organisational standards and procedures for routine machine maintenance and replacing worn out tools.
- Discuss the necessary precautions to be taken to avoid any hazard and accident during machining activities.

- performing milling activities such as face milling, side milling, angle milling of parts, etc..
- Employ appropriate ways of inspecting the manufactured component specifications and dimensions with the specified specifications and dimensions in the job orders.
- Apply appropriate inspection methods for identifying the defects, checking the quality of machined workpieces and noting the observations of inspection process as per the control plan.
- Show how to segregate damaged and ok workpieces and maintain records as per work instructions.
- Prepare a report about malfunctions and defects observed in machine during the machining process.
- Employ appropriate ways for doing routine machine maintenance and replacing worn out tools timely from the machine.

Classroom Aids:

Whiteboard, marker pen, projector

Tools, Equipment and Other Requirements

- Basic tool box, Work bench with vice
- Machining tools/ equipment: Surface marking plate, cutting tools, threading, dies & guides, etc.
- Machines: Conventional milling machine with standard accessories
- Measuring equipment: Vernier calipers, micrometre, feeler gauges, bore gauge, slip gauge, thickness gauge, steel ruler, measuring tape, height, gauge, dial gauge, angle plate, set square compass etc.
- Hand book, job orders, machine drawings, work order etc.
- **Safety materials**: Fire extinguisher, leather safety gloves, leather aprons, safety glasses with side shields, ear plug, helmet, safety shoe and first-aid kit.
- Cleaning material: Tip cleaner, wire brush (M.S.), cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel

Module 9: Introduction to Employability Skills Mapped to DGT/VSQ/N0102

Terminal Outcomes:

Discuss about Employability Skills in meeting the job requirements

Duration : <0.5:00>	Duration : <1:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes

 List different learning and employability related GOI and private portals and their usage 		
Classroom Aids:		
Whiteboard, marker pen, projector		
Tools, Equipment and Other Requirements		

Module 10: Constitutional values - Citizenship Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Discuss about constitutional values to be followed to become a responsible citizen

Duration : <0.5:00>	Duration : <1:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
• Explain constitutional values, civic rights, duties, citizenship, responsibility towards society etc. that are required to be followed to become a responsible citizen.	Show how to practice different environmentally sustainable practices
Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 11: Becoming a Professional in the 21st Century Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Demonstrate professional skills required in 21st century

Duration : <1:00>	Duration : <1.5:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
Discuss 21st century skills.	Exhibit 21st century skills like Self-

Describe the benefits of continuous learning	Awareness, Behavior Skills, time management, critical and adaptive thinking, problem-solving, creative thinking, social and cultural awareness, emotional awareness, learning to learn etc. in personal or professional life.
Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 12: Basic English Skills Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Practice basic English speaking.

Duration : <4:00>	Duration : <6:00>	
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes	
 Describe basic communication skills Discuss ways to read and interpret text written in basic English 	 Show how to use basic English sentences for everyday conversation in different contexts, in person and over the telephone Read and interpret text written in basic English Write a short note/paragraph / letter/e - mail using basic English

Module 13: Career Development & Goal Setting Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Demonstrate Career Development & Goal Setting skills.

Duration : <1:00>	Duration : <1:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
Discuss need of career development plan	Demonstrate how to communicate in a
22 1 4 1 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	well -mannered way with others.

22 | Automotive Conventional Machining Technician

	 Create a career development plan with well-defined short- and long-term goals
Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 14: Communication Skills Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Practice basic communication skills.

ctical – Key Learning Outcomes
Demonstrate how to communicate effectively using verbal and nonverbal communication etiquette

Module 15: Diversity & Inclusion Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Describe PwD and gender sensitisation.

Duration : <1:00>	Duration : <1.5:00>	
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes	
Discuss the significance of reporting sexual harassment issues in time	 Demonstrate how to behave, communicate, and conduct oneself appropriately with all genders and PwD 	
Classroom Aids:		

Whiteboard, marker pen, projector

Tools, Equipment and Other Requirements

Module 16: Financial and Legal Literacy Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Describe ways of managing expenses, income, and savings.

Duration: <2:00>	Duration: <3:00>	
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes	
 List the common components of salary and compute income, expenditure, taxes, investments etc. Discuss the legal rights, laws, and aids 	 Outline the importance of selecting the right financial institution, product, and service Demonstrate how to carry out offline and online financial transactions, safely and securely 	
Classroom Aids:		
Whiteboard, marker pen, projector		
Tools, Equipment and Other Requirements		

Module 17: Essential Digital Skills Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Demonstrate procedure of operating digital devices and associated applications safely.

Duration : <4:00>	Duration : <6:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Describe the role of digital technology in today's life Discuss the significance of using internet for browsing, accessing social media platforms, safely and securely 	use the associated applications and features, safely and securely

	Utilize virtual collaboration tools to work effectively
Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 18: Entrepreneurship Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Describe opportunities as an entrepreneur.

 Explain the types of entrepreneurship and enterprises Discuss how to identify opportunities for potential business, sources of funding and associated financial and legal risks with its mitigation plan 	Create a sample business plan, for the selected business opportunity
 enterprises Discuss how to identify opportunities for potential business, sources of funding and associated financial and legal risks with its mitigation plan 	·
 Describe the 4Ps of Marketing-Product, Price, Place and Promotion and apply them as per requirement 	
Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 19: Customer Service Mapped to DGT/VSQ/N0102

Terminal Outcomes:

• Describe ways of maintaining customer.

Duration: <2:00>	Duration : <3:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Explain the significance of identifying customer needs and addressing them. Explain the significance of identifying customer needs and responding to them in a professional manner. Discuss the significance of maintaining hygiene and dressing appropriately. 	Demonstrate how to maintain hygiene and dressing appropriately.

Classroom Aids:	
Whiteboard, marker pen, projector	
Tools, Equipment and Other Requirements	

Module 20: Getting ready for apprenticeship & Jobs $Mapped\ to\ DGT/VSQ/N0102$

Terminal Outcomes:

• Describe ways of preparing for apprenticeship & Jobs appropriately.

Duration : <3:00>	Duration : <5:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
 Discuss the significance of maintaining hygiene and confidence during an interview List the steps for searching and registering for apprenticeship opportunities 	 Create a professional Curriculum Vitae (CV) Use various offline and online job search sources such as employment exchanges, recruitment agencies, and job portals respectively Perform a mock interview

Tools, Equipment and Other Requirements	

Annexure

Trainer Requirements

Trainer Prerequisites						
Minimum Educational	Specialization	Relevant Industry Experience		Training Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
ITI	Machinist/Turner	5	Machining	1	Machining	NA
ITI	Machinist/Turner	6	Machining	0	Machining	NA
Certificate NSQ- Level 6	Machining Master Technician	5	Machining	1	Machining	NA
Diploma	Mechanical/Automobile	3	Machining	1	Machining	NA
Diploma	Mechanical/Automobile	4	Machining	0	Machining	NA

Trainer Certification		
Domain Certification	Platform Certification	
"Automotive Conventional Machining Technician, ASC/Q3510, version 1.0". Minimum accepted score is 80%.	Recommended that the trainer is certified for the job role "Trainer (VET and Skills)", Mapped to Qualification Pack: MEP/Q2601, V2.0" Minimum accepted score is 80%	

Assessor Requirements

Assessor Prerequisites						
Minimum Specialization Educational		Relevant Industry Experience		Training/Assessment Experience		Remarks
Qualification		Years	Specialization	Years	Specialization	
ITI	Machinist/Turner	6	Machining	1	Machining	NA
ITI	Machinist/Turner	7	Machining	0	Machining	NA
Certificate NSQ- Level 6	Machining Master Technician	6	Machining	1	Machining	NA
Diploma	Mechanical/Automobile	4	Machining	1	Machining	NA
Diploma	Mechanical/Automobile	5	Machining	0	Machining	NA

Assessor Certification		
Domain Certification	Platform Certification	
"Automotive Conventional Machining Technician, ASC/Q3510, version 1.0". Minimum accepted score is 80%.	Recommended that the Accessor is certified for the job role "Assessor (VET and Skills)", Mapped to Qualification Pack: MEP/Q2701, V2.0" Minimum accepted score is 80%	

Assessment Strategy

1. Assessment System Overview:

- Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
- Assessment agencies send the assessment confirmation to VTP/TC looping SSC
- Assessment agency deploys the ToA certified Assessor for executing the assessment
- SSC monitors the assessment process & records

2. Testing Environment:

- Confirm that the centre is available at the same address as mentioned on SDMS or SIP
- Check the duration of the training.
- Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.
- If the batch size is more than 30, then there should be 2 Assessors.
- Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
- Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
- Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
- Check the availability of the Lab Equipment for the particular Job Role.

3. Assessment Quality Assurance levels / Framework:

- Question papers created by the Subject Matter Experts (SME)
- Question papers created by the SME verified by the other subject Matter Experts
- Questions are mapped with NOS and PC
- Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
- Assessor must be ToA certified & trainer must be ToT Certified
- Assessment agency must follow the assessment guidelines to conduct the assessment

4. Types of evidence or evidence-gathering protocol:

- Time-stamped & geotagged reporting of the assessor from assessment location
- Centre photographs with signboards and scheme specific branding
- Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
- Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos

5. Method of verification or validation:

- Surprise visit to the assessment location
- Random audit of the batch
- Random audit of any candidate

6. Method for assessment documentation, archiving, and access

- Hard copies of the documents are stored
- Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
- Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

Glossary

Term	Description
Declarative Knowledge	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
Key Learning Outcome	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
OJT (M)	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on site
OJT (R)	On-the-job training (Recommended); trainees are recommended the specified hours of training on site
Procedural Knowledge	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
Training Outcome	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
Terminal Outcome	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.

Acronyms and Abbreviations

NOS	National Occupational Standard(s)
NSQF	National Skills Qualifications Framework
QP	Qualifications Pack
TVET	Technical and Vocational Education and Training
SOP	Standard Operating Procedure
GD&T	Geometric Dimensioning & Tolerancing
