## Training Parameters

<b>Sector</b>	Automotive
<b>Sub-Sector</b>	Manufacturing
<b>Occupation</b>	Assembly Operation
<b>Country</b>	India
<b>NSQF Level</b>	4
<b>Aligned to NCO/ISCO/ISIC Code</b>	NCO-2015/8211.1201
<b>Minimum Educational Qualification and Experience</b>	8th Class + 2 years ITI with 2 years of relevant experience OR 10th Class + 1 Year I.T.I with 2 Year of any experience OR 10th Class + 2 Year I.T.I with 1 Year of any experience OR 12th Class with 1 Year of relevant experience OR Certificate-NSQF (Electric Vehicle Assembly Operator Level 3) with 2 Years of relevant experience
<b>Pre-Requisite License or Training</b>	NA
<b>Minimum Job Entry Age</b>	17 years
<b>Last Reviewed On</b>	24/06/2021
<b>Next Review Date</b>	24/06/2026
<b>NSQC Approval Date</b>	24/06/2021
<b>QP Version</b>	1.0
<b>Model Curriculum Creation Date</b>	24/06/2021
<b>Model Curriculum Valid Up to Date</b>	24/06/2026
<b>Model Curriculum Version</b>	1.0
<b>Minimum Duration of the Course</b>	390 Hours 00 Minutes
<b>Maximum Duration of the Course</b>	390 Hours 00 Minutes

## Program Overview

This section summarizes the end objectives of the program along with its duration.

### Training Outcomes

At the end of the program, the learner should have acquired the listed knowledge and skills.

- Interpret assembly drawing/work instructions/SOPs for identification of raw material, tools and equipment required for the assembly operations.
- Perform pre-assembling activities such as lifting of workpiece, inspection of tools and equipment etc.
- Perform various assembling operations such as bolting, tightening, riveting, fastening, adhesive clamping, crimping etc.
- Perform post-assembly operations such as cleaning and testing of vehicle.
- Work effectively and efficiently as per schedules and timelines.
- Implement safety practices.
- Optimize the use of resources to ensure less wastage and maximum conservation.

### Compulsory Modules

The table lists the modules and their duration corresponding to the Compulsory NOS of the QP.

NOS and Module Details	Theory Duration	Practical Duration	On-the-Job Training Duration (Mandatory)	On-the-Job Training Duration (Recommended)	Total Duration
<b>Bridge Module</b>	<b>05:00</b>	<b>00:00</b>			<b>05:00</b>
Module 1: Introduction to the role of an Electric Vehicle Assembly Technician	5:00	0:00			5:00
<b>ASC/N9803 – Organize work and resources (Manufacturing)</b> <b>NOS Version No. – 1.0</b> <b>NSQF Level – 3</b>	<b>15:00</b>	<b>30:00</b>			<b>45:00</b>
Module 2: Organize work and resources according to safety and conservation standards	15:00	30:00			45:00
<b>ASC/N9802 – Interact effectively with colleagues, customers and others</b> <b>NOS Version No. – 1.0</b> <b>NSQF Level - 3</b>	<b>15:00</b>	<b>25:00</b>			<b>40:00</b>
Module 3: Communicate effectively and efficiently	15:00	25:00			40:00
<b>ASC/N9805 – Interpret engineering drawing</b> <b>NOS Version No. – 1.0</b> <b>NSQF Level - 4</b>	<b>15:00</b>	<b>15:00</b>			<b>30:00</b>

Module 4: Interpret engineering drawing	15:00	15:00			30:00
<b>ASC/N3619 – Perform electric vehicle assembly operations</b> <b>NOS Version No. – 1.0</b> <b>NSQF Level - 4</b>	<b>90:00</b>	<b>180:00</b>			<b>300:00</b>
Module 5: Prepare for electric vehicle assembly activities	30:00	60:00			90:00
Module 6: Perform electric vehicle components assembly and post-assembly activities	60:00	150:00			210:00
<b>Total Duration</b>	<b>140:00</b>	<b>250:00</b>			<b>390:00</b>

# Module Details

## Module 1: Introduction to the role of an Electric Vehicle Assembly Technician

### Bridge module

#### Terminal Outcomes:

- Discuss the role and responsibilities of an Electric Vehicle Assembly Technician.

<b>Duration:</b> <05:00>	<b>Duration:</b> <00:00>
<b>Theory – Key Learning Outcomes</b>	<b>Practical – Key Learning Outcomes</b>
<ul style="list-style-type: none"> <li>• List the role and responsibilities of an Electric Vehicle Assembly Technician.</li> <li>• Discuss the job opportunities for an Electric Vehicle Assembly Technician in the automobile industry.</li> <li>• Explain about Indian electric vehicle manufacturing market.</li> <li>• List various automobile Original Equipment Manufacturers (OEMs) and different products/ models manufactured by them.</li> <li>• Discuss the standards and procedures involved in the different processes of electric vehicle assembly.</li> <li>• List different types of EVs manufactured in the automobile industry.</li> <li>• Discuss various functional processes like procurement, store operation, inventory, quality system etc. in an automobile industry.</li> <li>• Identify the standard checklists and schedules recommended by OEM.</li> </ul>	
<b>Classroom Aids:</b>	
Whiteboard, marker pen, projector, standard checklists and schedules samples	
<b>Tools, Equipment and Other Requirements</b>	

## Module 2: Organize work and resources according to safety and conservation standards

### Mapped to ASC/N9803, v1.0

#### Terminal Outcomes:

- Employ appropriate ways to maintain safe and secure working environment.
- Perform work as per the quality standards.
- Apply conservation practices at the workplace.

Duration: <15:00>	Duration: <30:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul style="list-style-type: none"> <li>• List the potential workplace related risks and hazards, their causes and preventions.</li> <li>• Identify PPE to be used at workplace.</li> <li>• Identify various warning signs used at the workplace.</li> <li>• Describe appropriate strategies to deal with emergencies and accidents at the workplace.</li> <li>• Outline the organizational structure to be followed to report about health, safety and security breaches to the concerned authorities.</li> <li>• Discuss the importance of keeping work area clean and tidy.</li> <li>• Discuss the significance of conforming to basic hygiene practices such as washing hands, using alcohol based hand sanitizers or soap.</li> <li>• Discuss organizational hygiene and sanitation guidelines and ways of reporting breaches/gaps if any to the concerned authorities.</li> <li>• Discuss the ways of dealing with stress and anxiety.</li> <li>• Discuss how to complete the given work within the stipulated time period.</li> <li>• Explain how to maintain a proper balance between team and individual goals.</li> <li>• Explain 5S guidelines at workplace.</li> <li>• List the various materials used at the workplace.</li> <li>• Explain organisational recommended procedure for storage of tools, equipment and material after completion of work.</li> <li>• Explain the ways to optimize usage of resources.</li> <li>• Discuss various methods of waste management and its disposal.</li> </ul>	<ul style="list-style-type: none"> <li>• Apply appropriate safety practices to ensure safety of people at the workplace</li> <li>• Display the correct way of wearing and removing PPE such as face masks, hand gloves, face shields, PPE suits, etc.</li> <li>• Demonstrate the use of fire extinguisher.</li> <li>• Apply basic first aid procedure in case of emergencies.</li> <li>• Perform routine cleaning of tools, equipment and machines.</li> <li>• Employ various techniques for checking malfunctions in the equipment as per Standard Operating Procedure (SOP).</li> <li>• Show how to sanitize and disinfect one's work area regularly.</li> <li>• Demonstrate the correct way of washing hands using soap and water.</li> <li>• Demonstrate the correct way of sanitizing hands using alcohol-based hand rubs.</li> <li>• Demonstrate how to evacuate the workplace in case of an emergency.</li> <li>• Demonstrate sorting of materials, tools and equipment and spare parts after completion of work.</li> <li>• Demonstrate the steps involved in storage of tools, equipment and material after completion of work.</li> <li>• Perform basic checks to identify any spills and leaks and that need to be plugged /stopped.</li> <li>• Demonstrate different disposal techniques depending upon types of waste.</li> <li>• Employ different ways to check if equipment/machines are functioning as per requirements and report malfunctioning, if observed.</li> <li>• Employ ways for efficient utilization of material and water.</li> </ul>

- List the different categories of waste for the purpose of segregation
- Differentiate between recyclable and non-recyclable waste
- State the importance of using appropriate colour dustbins for different types of waste.
- Discuss common practices for conserving electricity at workplace.
- Discuss the common sources of pollution and ways to minimize it.

**Classroom Aids:**

Whiteboard, marker pen, projector

**Tools, Equipment and Other Requirements**

- Housekeeping material: Cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel, fire extinguisher
- Safety gears: Safety shoes, ear plug, goggles, gloves, helmet, first-aid kit

## Module 3: Communicate Effectively and Efficiently

### Mapped to ASC/N9802, v1.0

#### Terminal Outcomes:

- Use effective communication and interpersonal skills.
- Apply sensitivity while interacting with different genders and people with disabilities.

<b>Duration:</b> <15:00>	<b>Duration:</b> <25:00>
<b>Theory – Key Learning Outcomes</b>	<b>Practical – Key Learning Outcomes</b>
<ul style="list-style-type: none"> <li>• Explain the organizational structure for communicating with colleagues, seniors and others.</li> <li>• Discuss the ways to adjust the communication styles to reflect sensitivity towards gender and persons with disability (PwD).</li> <li>• Explain the importance of respecting personal space of colleagues.</li> <li>• State the procedure to receive work instructions and report problems to the supervisor.</li> <li>• List the various organizational policies and procedures to be followed at the workplace.</li> <li>• Describe different ways to rectify commonly occurring errors.</li> <li>• Explain the importance of complying with the instructions/guidelines and procedures while performing tasks related to the job specifications.</li> <li>• Discuss the importance of PwD and gender sensitization.</li> </ul>	<ul style="list-style-type: none"> <li>• Employ different means of communication depending upon the requirement while interacting with others.</li> <li>• Demonstrate using new ways to maintain good relationships with colleagues and supervisor.</li> <li>• Prepare a sample report to send the work status to the supervisor.</li> <li>• Demonstrate how to communicate with different genders and persons with disability (PwD) in a sensitive manner.</li> </ul>
<b>Classroom Aids:</b>	
Whiteboard, marker pen, projector	
<b>Tools, Equipment and Other Requirements</b>	
Sample of escalation matrix, organisation structure.	

## Module 4: Interpret engineering drawing

### Mapped to ASC/N9805, v1.0

#### Terminal Outcomes:

- Describe the basics of engineering drawing.
- Interpret the machine drawings and symbols for understanding the job requirements.

<b>Duration: &lt;15:00&gt;</b>	<b>Duration: &lt;15:00&gt;</b>
<b>Theory – Key Learning Outcomes</b>	<b>Practical – Key Learning Outcomes</b>
<ul style="list-style-type: none"> <li>• Identify uniqueness, dimensioning and important features of 2D and 3D shapes.</li> <li>• Identify types of lines, angles, points and their symmetry in shapes.</li> <li>• Differentiate between first angle and third angle projection.</li> <li>• Interpret 3 axis (x, y and z axis) of projection and machine symbols used in drawing.</li> <li>• Describe GD&amp;T and use of its symbols in the drawings.</li> <li>• Identify required limits and tolerances of component from drawing.</li> <li>• Explain standards used in India for making assembly drawings.</li> <li>• Identify organisational drawing standards for interpreting the work requirements appropriately.</li> </ul>	<ul style="list-style-type: none"> <li>• Read an object in first angle and third angle projection.</li> <li>• Demonstrate appropriate way of reading and interpreting the shapes (cones, cylinder, sphere, cuboid, etc) on to a 2D and 3D projection.</li> <li>• Interpret and read orthographic and isometric views.</li> <li>• Read GD&amp;T symbols in the given drawing.</li> <li>• Employ appropriate ways of storing the drawings in a defined and appropriate place.</li> <li>• Role play a situation on how to communicate the changes in drawing to the concerned authority.</li> </ul>
<b>Classroom Aids:</b>	
Whiteboard, marker pen, projector	
<b>Tools, Equipment and Other Requirements</b>	
<ul style="list-style-type: none"> <li>• Drawing tools</li> <li>• Engineering drawing handbook</li> <li>• Vehicle assembly drawings</li> </ul>	

## Module 5: Prepare for electric vehicle assembly activities

### Mapped to ASC/N3619, v1.0

#### Terminal Outcomes:

- Identify tools and equipment required for electric vehicle assembly operations
- Perform the steps to carry out pre-assembly activities such as lifting of vehicle components, inspection of tools and equipment, inspection of vehicle components for defects etc.

Duration: <30:00>	Duration: <60:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul style="list-style-type: none"> <li>• List various components /aggregates and the manufacturer's specifications of an electric vehicle.</li> <li>• Describe basic technology used, functioning and interconnections of various systems and components of the vehicle.</li> <li>• Recall fundamental terms, laws and principles of electricity used in EV.</li> <li>• Discuss various symbols, units and terms used in wiring diagrams associated with electrical/electric systems/components of the vehicle.</li> <li>• Discuss legal regulations that need to be taken into account for handling electric vehicles.</li> <li>• Discuss the information derived from the assembly drawings, work instructions, SOP's etc.</li> <li>• List the selection criteria of assembling method and required tools and equipment as per the requirement.</li> <li>• Explain various assembling operations such as bolting, tightening, riveting, fastening, adhesive clamping, crimping etc.</li> <li>• Discuss the impact of various assembly operations on the vehicle and its components.</li> <li>• Illustrate the process flow of assembly operations.</li> <li>• List tools, measuring instruments, equipment, auto components/parts and sub-assemblies required during assembling work.</li> <li>• Summarise the steps to be performed for checking and cleaning the assembling tools, accessories, measuring instruments and equipment</li> </ul>	<ul style="list-style-type: none"> <li>• Read the workorder, wiring diagrams and engineering drawings to identify assembling requirements and select the assembly methods needed to be performed.</li> <li>• Demonstrate the standard operating procedure to use tools, equipment and measuring instruments required during assembly process.</li> <li>• Apply appropriate ways to check and clean the assembling tools, accessories, measuring instruments and equipment before use.</li> <li>• Show how to check and clean the battery terminals of electric vehicle.</li> <li>• Display the procedure of setting up the equipment required for assembling work.</li> <li>• Perform the steps of lifting and placing the auto components on the designated place by using lifting tools.</li> <li>• Apply appropriate techniques to check the adhesion of roof-lining, insulation material, roof-rail etc. of the auto component.</li> <li>• Demonstrate the correct method of the assembly operation such as angle for holding the tools and equipment, direction of application of torque, ergonomics of hand/ body etc.</li> </ul>

<p>before use.</p> <ul style="list-style-type: none"> <li>• Discuss the process of filling CLRI sheet and reporting to the supervisor about the abnormalities identified and action taken in it.</li> <li>• List the steps for setting up the equipment required for assembling work.</li> <li>• State the importance of selecting right program in case of robotic assembly method as per the work instructions.</li> <li>• Discuss the process of lifting and placing the auto components on the designated place as per the work instructions.</li> <li>• List the steps to be performed for checking the adhesion of roof-lining, insulation material, roof-rail etc. of the auto component.</li> </ul>	
<b>Classroom Aids:</b>	
Whiteboard, marker pen, projector	
<b>Tools, Equipment and Other Requirements</b>	
<ul style="list-style-type: none"> <li>• PPT's, teaching aids, torqueing charts, assembly drawing / blue print, component assembly plan</li> <li>• <b>Measuring and marking tools:</b> Steel tape, steel rule, vernier calliper, micrometre, compass, divider, scribe, T Square, bevel protractor, pin set, torque meter etc.</li> <li>• <b>Assembly tools and equipment:</b> Riveting machine, drilling machine, riveting guns, pneumatic guns, fasteners, rubber seals, soldering iron, jigs, fixtures, adhesives</li> <li>• <b>Components:</b> Bolts, nuts, screws, wires, fasteners, connectors, sealants, adhesive bonding material etc.</li> <li>• <b>Lifting devices:</b> Hoists, cranes, bins, part trolleys, pallet trucks</li> <li>• <b>Safety materials:</b> Fire extinguisher, portable welding curtains, leather safety gloves, leather aprons, safety glasses, helmet, safety shoe and first-aid kit</li> <li>• <b>Cleaning material:</b> Tip cleaner, wire brush (M.S.), cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel</li> </ul>	

## Module 6: Perform electric vehicle components assembly and post-assembly activities

### Mapped to ASC/N3619, v1.0

#### Terminal Outcomes:

- Demonstrate various assembly operations such as bolting, tightening, riveting, fastening, adhesive clamping, crimping etc.
- Perform steps to carry out post-assembly activities.

Duration: <60:00>	Duration: <120:00>
Theory – Key Learning Outcomes	Practical – Key Learning Outcomes
<ul style="list-style-type: none"> <li>• Discuss the necessary precautions to be taken to avoid any hazard and accident during assembly activities.</li> <li>• Outline the process of an electric vehicle mechanical components assembly operations such as bolting, riveting, tightening etc. and electrical components assembly operations such as wire connections, wire color identification, wire routing, wire stripping, crimping, soldering, high frequency welding etc.</li> <li>• List the steps to be performed for adjustment, alignment and setting of the parts, assemblies and aggregates as per Product Quality Standard (PQS).</li> <li>• List various sealing compounds.</li> <li>• Discuss the process of application of sealing compounds, gaskets and adhesives on a vehicle assembly.</li> <li>• List the steps to be performed for labelling the auto components.</li> <li>• Discuss the information needed to be mentioned on the labels of the auto components.</li> <li>• Recall the tasks to be performed post-assembly.</li> <li>• Discuss the importance of selecting correct lubricant.</li> <li>• Explain properties and specifications of lubricant required for lubricating the required component.</li> <li>• List commonly occurring defects in the assembled vehicle.</li> <li>• Discuss the impact of defects on the quality of assembled vehicle.</li> <li>• Explain the inspection methods for identifying the defects and checking</li> </ul>	<ul style="list-style-type: none"> <li>• Demonstrate organizational specified procedure of all assembly operations such as bolting, riveting, tightening, wire stripping, crimping, soldering, high frequency welding etc.</li> <li>• Employ appropriate assembly method for assembling of safety parts i.e. bearings, shafts etc., battery systems, motors, electrical components such as electric wire harness, Electronic Control Unit (ECU) etc. and other similar parts in electric vehicle.</li> <li>• Demonstrate the organizational specified procedure of installing the various components of oil and lube system in the vehicle.</li> <li>• Show how to adjust, align and set the parts, assemblies and aggregates as per Product Quality Standard (PQS).</li> <li>• Apply appropriate ways to check the leakage of water, oil, air etc. near the battery system.</li> <li>• Demonstrate how to number the wires connected to batteries of the vehicle.</li> <li>• Apply appropriate ways of sealing to prevent water leakage in vehicle components.</li> <li>• Demonstrate the organizational specified procedure for labelling the auto components as per the assembly process and quality standards followed.</li> <li>• Display how to lubricate the vehicle components.</li> <li>• Employ appropriate ways to check the level of battery charge, battery water, brake oil, gear oil, engine oil etc. in the vehicle.</li> <li>• Perform the steps to check the quality</li> </ul>

<p>the quality of assembled vehicle as per the control plan.</p> <ul style="list-style-type: none"> <li>Recall organisational recommended procedure for storage of tools, equipment and fixture after completion of work.</li> <li>List different methods for disposing off waste material and scrap.</li> </ul>	<p>of assembled components as per the control plan and work instructions.</p> <ul style="list-style-type: none"> <li>Apply appropriate inspection methods for identifying the defects in assembled vehicle.</li> <li>Perform steps to check the current in battery by using multimeter.</li> <li>Demonstrate the organisational procedure involved in storage of tools, equipment and fixtures after completion of work.</li> <li>Show how to dispose scrap or waste as per organisational guidelines.</li> </ul>
<b>Classroom Aids:</b>	
Whiteboard, marker pen, projector	
<b>Tools, Equipment and Other Requirements</b>	
<ul style="list-style-type: none"> <li>PPT's, teaching aids, torqueing charts, assembly drawing / blue print, component assembly plan</li> <li><b>Measuring and marking tools:</b> Steel tape, steel rule, vernier calliper, micrometre, compass, divider, scribe, T Square, bevel protractor, pin set, torque meter etc.</li> <li><b>Assembly tools and equipment:</b> Riveting machine, drilling machine, riveting guns, pneumatic guns, fasteners, rubber seals, soldering iron, jigs, fixtures, adhesives</li> <li><b>Components:</b> Bolts, nuts, screws, wires, fasteners, connectors, sealants, adhesive bonding material etc.</li> <li><b>Lifting devices:</b> Hoists, cranes, bins, part trolleys, pallet trucks</li> <li><b>Safety materials:</b> Fire extinguisher, portable welding curtains, leather safety gloves, leather aprons, safety glasses, helmet, safety shoe and first-aid kit</li> <li><b>Cleaning material:</b> Tip cleaner, wire brush (M.S.), cleaning agents, cleaning cloth, waste container, dust pan and brush set, liquid soap, hand towel</li> </ul>	

# Annexure

## Trainer Requirements

Trainer Prerequisites						
Minimum Educational Qualification	Specialization	Relevant Industry Experience		Training Experience		Remarks
		Years	Specialization	Years	Specialization	
ITI	Turner/Fitter	5	Turner/Fitter	1	Turner/Fitter	NA
ITI	Turner/Fitter	6	Automotive Assembly	0	Automotive Assembly	NA
Diploma	Electrical/ Automobile	3	Electrical/ Automobile	1	Electrical/ Automobile	NA
Diploma	Electrical/ Automobile	4	Electrical/ Automobile	0	Electrical/ Automobile	NA

Trainer Certification	
Domain Certification	Platform Certification
“Electric Vehicle Assembly Technician, ASC/Q3605, version 1.0”. Minimum accepted score is 80%.	“Trainer, MEP/Q2601 v1.0” Minimum accepted score is 80%.

## Assessor Requirements

Assessor Prerequisites						
Minimum Educational Qualification	Specialization	Relevant Industry Experience		Training/Assessment Experience		Remarks
		Years	Specialization	Years	Specialization	
ITI	Turner/Fitter	6	Turner/Fitter	1	Turner/Fitter	NA
ITI	Turner/Fitter	7	Automotive Assembly	0	Automotive Assembly	NA
Diploma	Electrical/ Automobile	4	Electrical/ Automobile	1	Electrical/ Automobile	NA
Diploma	Electrical/ Automobile	5	Electrical/ Automobile	0	Electrical/ Automobile	NA

Assessor Certification	
Domain Certification	Platform Certification
“Electric Vehicle Assembly Technician, ASC/Q3605, version 1.0”. Minimum accepted score is 80%.	“Assessor; MEP/Q2701 v1.0” Minimum accepted score is 80%.

## Assessment Strategy

1. Assessment System Overview:
  - Batches assigned to the assessment agencies for conducting the assessment on SDMS/SIP or email
  - Assessment agencies send the assessment confirmation to VTP/TC looping SSC
  - Assessment agency deploys the ToA certified Assessor for executing the assessment
  - SSC monitors the assessment process & records
2. Testing Environment:
  - Confirm that the centre is available at the same address as mentioned on SDMS or SIP
  - Check the duration of the training.
  - Check the Assessment Start and End time to be as 10 a.m. and 5 p.m.
  - If the batch size is more than 30, then there should be 2 Assessors.
  - Check that the allotted time to the candidates to complete Theory & Practical Assessment is correct.
  - Check the mode of assessment—Online (TAB/Computer) or Offline (OMR/PP).
  - Confirm the number of TABs on the ground are correct to execute the Assessment smoothly.
  - Check the availability of the Lab Equipment for the particular Job Role.
3. Assessment Quality Assurance levels / Framework:
  - Question papers created by the Subject Matter Experts (SME)
  - Question papers created by the SME verified by the other subject Matter Experts
  - Questions are mapped with NOS and PC
  - Question papers are prepared considering that level 1 to 3 are for the unskilled & semi-skilled individuals, and level 4 and above are for the skilled, supervisor & higher management
  - Assessor must be ToA certified & trainer must be ToT Certified
  - Assessment agency must follow the assessment guidelines to conduct the assessment
4. Types of evidence or evidence-gathering protocol:
  - Time-stamped & geotagged reporting of the assessor from assessment location
  - Centre photographs with signboards and scheme specific branding
  - Biometric or manual attendance sheet (stamped by TP) of the trainees during the training period
  - Time-stamped & geotagged assessment (Theory + Viva + Practical) photographs & videos
5. Method of verification or validation:
  - Surprise visit to the assessment location
  - Random audit of the batch
  - Random audit of any candidate
6. Method for assessment documentation, archiving, and access
  - Hard copies of the documents are stored
  - Soft copies of the documents & photographs of the assessment are uploaded / accessed from Cloud Storage
  - Soft copies of the documents & photographs of the assessment are stored in the Hard Drives

## References

## Glossary

Term	Description
<b>Declarative Knowledge</b>	Declarative knowledge refers to facts, concepts and principles that need to be known and/or understood in order to accomplish a task or to solve a problem.
<b>Key Learning Outcome</b>	Key learning outcome is the statement of what a learner needs to know, understand and be able to do in order to achieve the terminal outcomes. A set of key learning outcomes will make up the training outcomes. Training outcome is specified in terms of knowledge, understanding (theory) and skills (practical application).
<b>OJT (M)</b>	On-the-job training (Mandatory); trainees are mandated to complete specified hours of training on site
<b>OJT (R)</b>	On-the-job training (Recommended); trainees are recommended the specified hours of training on site
<b>Procedural Knowledge</b>	Procedural knowledge addresses how to do something, or how to perform a task. It is the ability to work, or produce a tangible work output by applying cognitive, affective or psychomotor skills.
<b>Training Outcome</b>	Training outcome is a statement of what a learner will know, understand and be able to do upon the completion of the training.
<b>Terminal Outcome</b>	Terminal outcome is a statement of what a learner will know, understand and be able to do upon the completion of a module. A set of terminal outcomes help to achieve the training outcome.

## Acronyms and Abbreviations

<b>NOS</b>	National Occupational Standard(s)
<b>NSQF</b>	National Skills Qualifications Framework
<b>QP</b>	Qualifications Pack
<b>TVET</b>	Technical and Vocational Education and Training
<b>SOP</b>	Standard Operating Procedure
<b>WI</b>	Work Instructions
<b>PPE</b>	Personal Protective equipment
