Performance Criteria	As described in the relevant OS units

Definitions	Keywords /Terms	Description
	Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
	Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
	Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
	Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or an area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
	Sub-function	Sub-functions are sub-activities essential to fulfill the achieving the objectives of the function.
	Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
	Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the knowledge and understanding they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
	Performance Criteria	Performance criteria are statements that together specify the standard of performance required when carrying out a task.
	National Occupational Standards (OS)	NOS are occupational standards which apply uniquely in the Indian context.
	Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
	Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
	Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.	
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.	
Knowledge and Understanding	Knowledge and understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.	
Organizational Context	Organizational context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.	
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.	

**Acronyms**

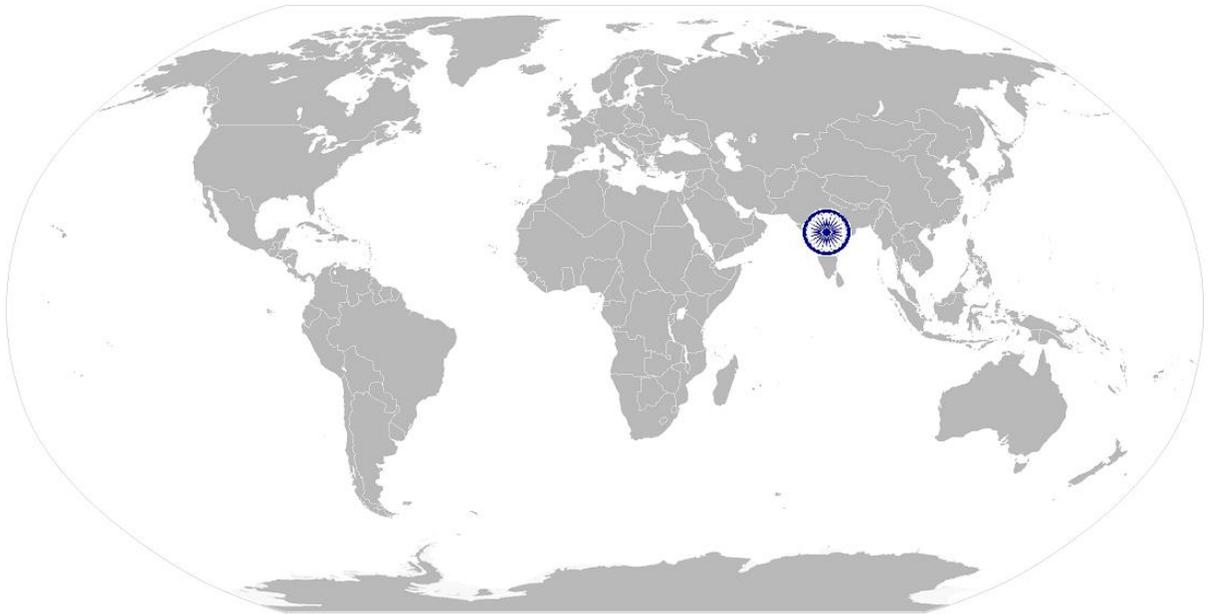

Core Skills/ Generic Skills	Core skills or generic skills are a group of skills that are the key to learning and working in today’s world. These skills are typically needed in any work environment in today’s world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.

Safely unload raw material to stores and load finished goods from stores

---

# National Occupational Standards

## Overview

This unit is about safely unloading the raw material received from vendors to stores and loading the finished goods from stores to the transport vehicle for dispatch to customer.

ASC/N6101

**Safely unload raw material to stores and load finished goods from stores**

National Occupational Standard	<b>Unit Code</b>	ASC/N6101
	<b>Unit Title (Task)</b>	<b>Safely unload raw material to stores and load finished goods from stores</b>
	<b>Description</b>	This OS unit is about the executive safely unloading received raw material from vendors and moving it to stores. The executive is also responsible for loading the finished goods kept in stores into the transport vehicle for despatch to customer
	<b>Scope</b>	The unit/ task covers the following for the loading / unloading operator working in a stores of a manufacturing unit or a god own / warehouse of a Logistics Unit ( referred to as a "Store" in this document ): <ul style="list-style-type: none"> <li>• unloading the raw material</li> <li>• loading the finished goods</li> </ul>
<b>Performance Criteria(PC) w.r.t. the Scope</b>		
	<b>Element</b>	<b>Performance Criteria</b>
	<b>General</b>	<p>PC1. Understand from supervisor the exact task of loading /unloading and in case of heavy objects co-ordinate with a team member for carrying out the task jointly</p> <p>PC2. Plan the days / weeks requirement of packing material viz. the boxes, trolleys, strapping etc. as per the BOM/WI. Report consumption and shortages as per the instructions of the supervisor.</p> <p>PC3. Take care to load appropriate numbers / quantity to avoid over-loading .</p> <p>PC4. In case of large and different shaped objects take help of supervisor and load components, assemblies, vehicles in space efficient layouts.</p> <p>PC5. Be sure to use appropriate protective equipment for personal safety.</p> <p>PC6. Always move trolleys / forklifts in designated lanes, paths which do not criss cross any manufacturing process area , or people vehicle movement zones .</p> <p>PC7. To work as per the Stores officer/ supervisor's instructions for tasks such as application of protective treatment (plug, covers, anti-rust oil etc.) counting , physical stock taking, tagging etc.</p>
	<b>Unloading</b>	<p>To be competent , the user/individual on the job must be able to:</p> <p>PC8. take the trolley/forklift truck and unload the received raw material/ parts safely from vendor's vehicle</p> <p>PC9. move the material using the trolley /fork lift truck and take it to stores</p> <p>PC10. Take charge of papers, documents to hand these over to Stores for verification.</p> <p>PC11. The empty trolleys which are being used after return should be checked for damages and counted to tally with documents.</p>
	<b>Loading</b>	<p>To be competent , the user/individual on the job must be able to:</p> <p>PC12. based on the weight of the goods, load them manually or by material Handling equipment like forklift /trolley in a safe manner. Take care to follow The WI regarding delicate material, orientation etc.</p>

ASC/N6101

**Safely unload raw material to stores and load finished goods from stores**

	<p>PC13. take the trolley /forklift truck to stores and place the finished goods kept in Stores that are to be dispatched.</p> <p>PC14. move the trolley /fork lift truck along with the goods near to the transport vehicle</p> <p>PC15. for usage of component specific trolleys (items being shipped in without packing boxes) take care to check correspondence of ID and parts, rain/ dust protective covers, no damage to the parts in the loading /unloading operation.</p> <p>PC16. take care that there is no damage to the parts/vehicles' paint, finish etc while Loading unloading.</p> <p>PC17. inform supervisor based on days' load if specific material handling Equipment like crane etc. needed for loading / unloading for big consignments.</p> <p>PC18. hand over the documents (dispatch, insurance etc.)to the vehicle driver making sure that these are jointly tallied for correspondence, completeness with the shipment.</p> <p>PC19. take the trolley /forklift truck to stores and place the finished goods kept in stores that are to be dispatched. Move the trolley /fork lift truck along with the goods near to the transport vehicle as is needed.</p> <p>PC 20.Take care that appropriate rain/ dust protection is used with suitable tying- up arrangement to last during the travel duration.</p>
<b>Knowledge and Understanding (K)</b>	
<b>A. Organizational Context</b> (Knowledge of the company / organization and its processes)	<p>The user/individual on the job needs to know and understand:</p> <p>KA1. the location of stores and dispatch departments in company</p> <p>KA2. material handling equipments used in the company</p> <p>KA3. escalation procedure in case of emergency and crisis situations</p> <p>KA4. product knowledge from the point of view of care to be taken during handling, storage and preservation.</p>
<b>Skills (S)</b>	
<b>A. Core Skills/ Generic Skills</b>	<b>Communication skills</b>
	<p>The user/individual on the job needs to know and understand how to:</p> <p>SA1. communicate with the shop floor and dispatch/stores supervisor in case of any discrepancy arising in the process</p>

## **Qualification Pack for Loading and Unloading Operator/ Loader**

### **Criteria for assessment of Trainees**

Job Role:- Loader /Loading unloading operator Level 2

Qualification Pack: - ASC/Q 6101

Sector Skill Council Automotive Skills Development

### **Guidelines for Assessment**

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Assessment will be conducted for all compulsory NOS, and where applicable, on the selected elective/option NOS/set of NOS.
4. To pass the Qualification Pack, every trainee should score a minimum of 60% of aggregate marks to successfully clear the assessment.
5. In case of *unsuccessful completion*, the trainee may seek reassessment on the Qualification Pack.

<b>Assessable Outcomes</b>	<b>Assessment Criteria of Outcomes</b>	<b>Total Marks</b>	<b>Out Of</b>	<b>Theory</b>	<b>Skills Practical</b>
ASC/N6101(Safely unload raw material to stores and load finished goods from stores) -General	PC1. Understand from supervisor the exact task of loading /unloading and in case of heavy objects co-ordinate with a team member for carrying out the task jointly	100	6	4	2
